

JEFFIN FRANCIS

Frontend Developer | React Specialist

Ontario, Canada | +1 (519) 661-9501 | jfran123@my.centennialcollege.ca | linkedin.com/in/jeffin-francis-78193841 | github.com/jeffinfrancis

PROFESSIONAL SUMMARY

Software Developer with 3+ years of experience designing and building responsive, user-centric web applications. Knowledgeable in React, JavaScript,.Net,MSSQL, HTML5, and CSS3 with proven ability to create intuitive UIs and integrate APIs. Skilled in testing, debugging, and optimizing application performance. Currently a Software Engineering Technician student at Centennial College, bringing both professional expertise and current best practices in modern web development and Agile methodologies.

KEY ACHIEVEMENTS

- Designed and built reusable, configuration-based .NET Core modules adopted across multiple enterprise applications, cutting duplication and reducing onboarding time.
- Delivered scalable REST APIs with improved throughput and security compliance for a publishing platform serving thousands of users.
- Integrated React front-ends with .NET Core APIs and SQL Server backends, delivering end-to-end full-stack features independently.
- Optimized front-end rendering and API response handling to improve application performance; implemented code-splitting, lazy loading, and caching strategies for faster load times in different environments.

TECHNICAL SKILLS

Languages:	C#, TypeScript, JavaScript, Python
Frameworks:	.NET Core, ASP.NET MVC, .NET Framework, React, Flask
Web & UI:	HTML5, CSS3, Bootstrap, jQuery, AJAX, Web API
Databases:	MSSQL Server, SQLite, Firebase, Oracle DB
Cloud & DevOps:	Microsoft Azure
Tools & Platforms:	Visual Studio, VS Code, Git, TFS, Jira , Unix, NopCommerce
Practices:	Agile/Scrum, RESTful API design, Dependency Injection, OOP, Entity Framework, Unit Testing (JustMock)

PROFESSIONAL EXPERIENCE

PyQuest — Course Project

April 2026

- Developed a full-stack web-based learning platform using **Python**, **Flask**, and **SQLite**.

- Implemented secure user authentication with registration, login, and session management.
- Designed and managed a relational SQLite database for users, courses, quizzes, and learning progress.
- Built responsive user interfaces using HTML, CSS, JavaScript, and Jinja2 templates.
- Implemented CRUD functionality for course content, questions, and user profiles.
- Applied Git version control throughout the development process.
- Implemented code sandbox to write python code and evaluate the submitted code against the test cases and update the progress.

Software Engineer | [Suyati Technologies](#) | India

May 2015 – Mar 2020

- Developed enterprise solutions for a publishing domain using ASP.NET MVC, .NET Core, and React JS, supporting the full author-to-sales workflow.
- Built Book Publishing Platform with Amazon S3 integration, REST APIs, background services, and React/Angular dashboards enabling end-to-end content management.
- Integrated NopCommerce, Sitecore CMS, and Salesforce into unified systems, streamlining business operations across departments.
- Conducted code reviews and automated testing using JustMock; maintained WIKI documentation used across the engineering team.

PROJECT HIGHLIGHTS

PyQuest – Centennial

- PyQuest is a gamified web-based learning platform designed to help beginners learn Python through interactive coding challenges. The system incorporates game-like elements such as experience points (XP), achievements, and daily missions to increase engagement and motivation. Users can progress through levels, complete challenges, and track their performance over time.

Book Publishing Platform — Suyati Technologies

- Enterprise-grade platform managing the full publishing lifecycle from author submissions to sales. Integrated Amazon S3 for media storage, REST APIs for system interoperability, and React dashboards for editorial workflows. Imprints creation using sitecore cms and ecommerce implementation using nopcommerce and integrated third-party applications into the domain. Also salesforce is integrated to achieve the workflows in the book publishing journey in the websites and tools.

EDUCATION

Software Engineering Technician (Ongoing)

[Centennial College, Toronto, Ontario, Canada](#)

2026

Bachelor of Technology (B.Tech) — Information Technology

[ICET, Mahatma Gandhi University, India](#)

2011

ADDITIONAL

- Good command of software design patterns, SOLID principles.
- Comfortable working with Agile/Scrum workflows, sprint ceremonies, continuous integration, and collaborative delivery environments.
- Good communication and collaboration skills.
